25X1

	•	SECTIVITY CONTINUE OF THE LALE OF THE
		2
25X1		Five sentries were posted along the northern border of the installation on Heerstrasse, while two sentries were observed near the hangars and the fuel dump respectively. There was a DF station with four masts west of the field and about 180 meters west of the railroad line. A radio truck with a mast five to six meters high was located about 100 meters north northwest of the DF station.
25X1	5。	An estimated 50 single-engine aircraft were parked at the northern edge of the field on 23 January. Because of poor visibility, the south site of the installation could not be observed.
25X1	6.	Cn 31 January, hh single-engine aircraft were counted at the northern edge of the field; another estimated six to eight planes were also parked there 25X1 Five single-engine planes were observed at the southern edge of the installation. There was no flying. A radio installation with four masts had been set up on a little hill west of the field.
25X1	计	Comment. For location of this Adcock DF station, see annex. Comment. Doeberitz airfield is still occupied by two ground attack regiments, each of which was equipped with about 60 II—10s. Some of these aircraft certainly were in the hangars, while the field was under observation. Fuel shipments were repeatedly dispatched to the ground units of 25X1
25X1 25X1		these two regiments in the course of the last months. 90 IL-10s were parked at the field on 10 and 88 on 16 January The mircraft of each of the two regiments According to available information they are differentiated only by their colored leading edges of the rudder assemblies. The mircraft of one regiment has blue stripes while that of the other has red stripes.
